

## What is the Federal/Department of Defense Practice at InfoTech?

Our Federal/DoD practice provides a systematic methodology of application development tailored to agencies' needs while staying compliant with Federal/DoD regulations and directives. With program and project managers who understand the Federal/DoD processes, and with an agile workforce in multiple disciplines, InfoTech is able to deliver solutions on time and on budget.

## How does InfoTech Practice Federal/Department of Defense Systems Development?

Our years of experience in both the Federal/DoD and commercial arenas enable us to combine the best of both worlds and provide an approach that is open-minded with a unique perspective, an uncommon advantage among traditional government contractors.

## Why use InfoTech for Your Federal/Department of Defense Needs?

- **Experienced Engineers and Developers** – Over the years, InfoTech has consistently developed integration capabilities and security systems for the DoD. We have leveraged our engineering and systems development experience from the commercial world into the Federal/DoD arena. We maintain a fully credentialed staff of IT professionals, including systems analysts, software engineers, database analysts and QA & QC personnel, all led by experienced project managers.
- **Systems Development** – Using the latest technologies of modern development tools and methodologies while staying compatible with industry standards, we are able to improve quality of the product by increasing the quality of code, product security and product performance. It is this unique symbiotic association of services, along with a highly motivated and experienced workforce, that yields the excellence of service provided by InfoTech to Federal/DoD agencies and commands.
- **Microsoft Certified Partner** – We are a Microsoft Certified Partner, a status that requires us to provide Microsoft with actual samples of applications developed for clients during the previous year. Microsoft confirms directly with our clients that the development and deployment were successful.
- **GSA Certified by the U.S. Government** – We have developed various applications for the Department of Defense (DoD), and we are an approved vendor on the Government GSA (General Services Administration) schedule (GSA# 35FO22OT).
- **In-Shoring/ U.S.-Based Labor Only** – InfoTech does not off-shore any work overseas. We only use U.S. labor, offering our customers the highest quality expertise, supported by strong communication channels and a clear understanding of the U.S. business environment. With headquarters in New York, and a full backbone operation in Minot, North Dakota, this business model has been beneficial to InfoTech and our clients.
